EXPERIENCE

Experian, Austin, Tx. — Staff Software Engineer

September 2019 - present

Tech lead for multiple greenfield initiatives utilizing React, TypeScript, and NodeJS.

Led the effort to streamline development standards for the team's process, code style, testing, tooling, and best practices for a React-based development effort.

I established myself as the go-to engineering resource for React/TypeScript questions and implementation. I also helped to mentor and guide other developers.

I was able to implement the project's build and CI/CD pipeline..

Collaborated with product, design, and backend teams to facilitate front-end implementation of features.

Contributed to architectural decisions for multiple projects that I was involved in.

Rackspace, Austin, Tx. — Front End Developer

April 2018 - February 2019

Worked on the front end team tasked with building a greenfield ticketing web app for public and internal use. Technologies used included Typescript, React, Redux.

Victory CTO, Austin, Tx. — Front End Developer

September 2017 - December 2017

Worked on a small agile team tasked with a ground-up rebuild of naturallycurly.com. Technologies used included HTML, SASS, ES6 on the front end, and PHP/Laravel back end.

EDUCATION

University of Southern Mississippi, Hattiesburg, MS — Masters of Music

August 2013 - May 2015

SKILLS

JavaScript

TypeScript

React

Redux

Storybook

HTML/CSS/SASS

CSS in JS

NodeJS

REST

MuleSoft

PHP

GraphQL

Jest

Testing Library

Vite

Vitest

Webpack

Git/Git Actions

Docker
